

How to Replace Flint in Sisuman Butane Lighter

Posted by Luis Paredes on Nov 23, 2020

If you've been enjoying your Sisuman Soft Flame Cigar Lighter, chances are it's time to replace the flint. It's an easy process that we've broken down into just a few steps.

How to Replace Flint in Sisuman Butane Lighter

Step 1. | Twist off the retainer screw.

Step 2. | Make sure you keep the retainer pieces together (screw, spring, and metal rod)

Step 3. | Tip the lighter into your palm. The old flint will slide out.

Step 4. | Pick out a new flint

Step 5. | Use tweezers (recommended) to drop in the new flint.

Step 6. | Push the retainer back in and screw it close.

Step 7. | Congrats! Now you can enjoy your cigar lighter again!
